Multiscrim – Textile Care and Maintenance

With regular care and maintenance, your Herman Miller furniture will provide many years of superior performance and satisfaction. To maintain the quality of your Herman Miller textiles, please follow the cleaning procedures outlined here. The instructions for the care and maintenance of Herman Miller Products are provided to you as a service. No warranty is implied since results may vary.

- For normal cleaning, vacuum as needed, using an upholstery attachment. If further cleaning is needed, dry-clean or spot clean fabric with a solvent cleaner.
- Do not brush fabric or use a vacuum attachment with a rotary brush as brushing may permanently damage the nap or change the character of the fabric.
- If large areas are soiled, have a professional cleaning firm clean the fabric with a dry compound upholstery shampoo.

For further information on care and maintenance of finishes and textiles, please contact your Herman Miller Customer Service Representative.
